Moscow

We are glad to present you “KAMROCK” – the biggest manufacturer of the man-made veneer stone and decorative brick, as well as other cladding materials and products for landscape design and garden decor on the territory of CIS.

Our activities started in 1997 with the organization of the first production of covering materials, such as man-made veneer stone and decorative brick on the territory of Russia. It was based on an American technology, which subsequently we had to refine due to the increased requirements to usage conditions, in particular, weather conditions in Siberia. In the end, we managed to become a major supplier and import-substituting enterprise of in that time only starting individual cottage construction in Russia. Subsequently, those first settlements of houses riveted with KAMROCK® veneer stone turned into high-class elite settlements near Moscow. We successfully managed to replace covering materials supplied from the United States and Canada.

Further development of private housing construction called us for the development of KAMROCK® product distribution in Russia and neighboring countries. High quality and sustained performance of our products, their constant availability in our warehouses, the feasibility of individual orders, allow dealers to steadily increase their income.

Over the years of development from artisanal production, made a jump-start, we went to the industrial scale of production. Now we are a rock-solid industrial enterprise located on the territory of more than 5 ha with its own developed infrastructure, which is essential for reducing production costs and for stable operation of the factory.

Today our production capacity came up to the annual volume of marketable products measured in hundreds of thousands of conditional square feet. We use the most advanced production technologies, allowing us to almost instantly increase the production volume by at least 2 times. As a supplier of large-scale development projects, we repeatedly increased production capacity at any one time, if it was necessary to reduce the delivery time.

An important factor of our development is the fact that while being the industry's largest production enterprise, we remain customer-oriented, filling along with large-scale also small individual orders, often associated with the development and manufacturing of custom-made products.

We know perfectly well how a territorial difference affects consumer preferences. The production process we use allows us to produce absolutely any product palette, which would look confusingly similar to the natural counterparts both in texture and in natural colors with the territorial consumer preferences. Production change-over to a new product range is also possible and, if necessary, can be carried out within the shortest time.

Our close cooperation with the leading architects allows us to update regularly the range of standard products. Over the years our primary range of products based on best-sellers of the American and European markets has grown significantly. All the above mentioned provide us with a unique opportunity for effective and mutually beneficial cooperation.

If you choose KAMROCK®, you've got:

- high-quality products
- the widest range of textures and colors, including custom-made ones
- full customer's support and individual approach
- solid packaging and smoothly running logistics
- stability of supplies, the minimum fulfillment time of an order
- long lifetime of materials
- competitive prices and flexible price policy
- reliable, experienced partner in the implementation of architectural projects of any sizes

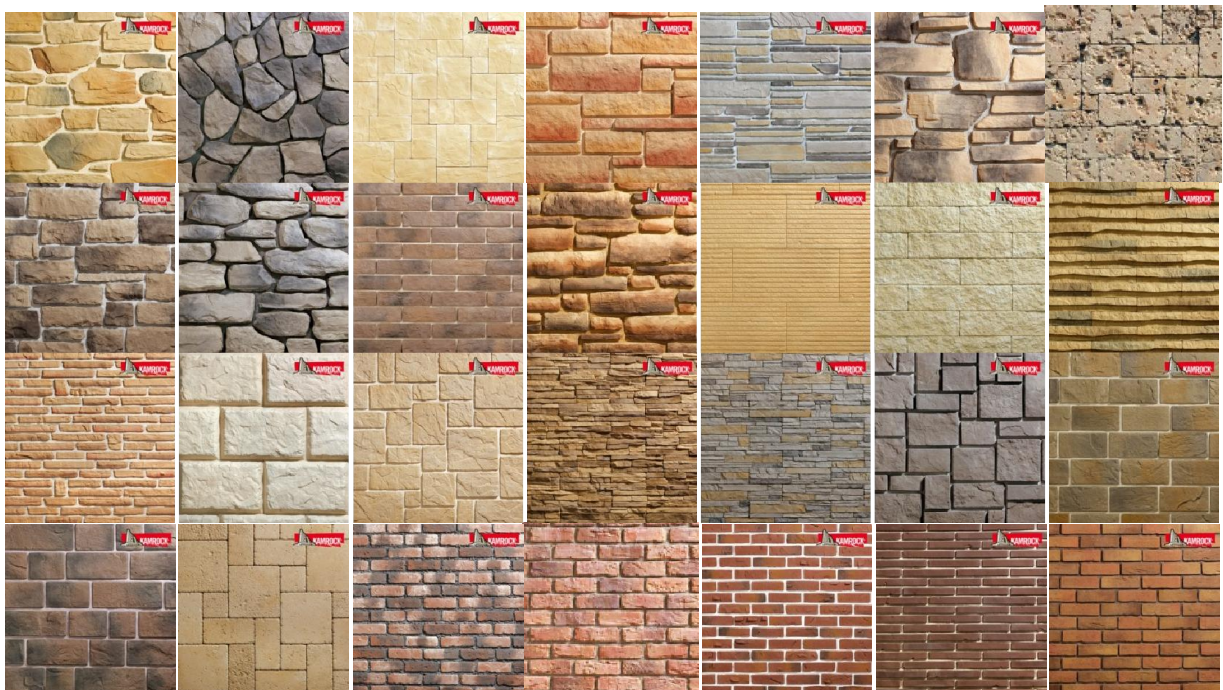

All collections of coating materials are being developed in collaboration with architects and designers and in accordance with current trends - along with the classic collections of brick and stone there are exclusive and fashionable solutions for facades and interiors in the product line.

The product range includes:

- decorative veneer stone (man-made stone);
- thin decorative bricks;
- facade decorative elements;
- planks, elements for landscape design
- thermopanel based on expanded polystyrene (EPS) and polyurethane (PU);
- pavestones, kerbstones, paving slabs and paving flags;

All products are certified and have all necessary hygienic, fire certificates, certificates of conformity. All coating materials are recommended for interior and external cladding works in residential, public and industrial buildings and structures and are considered as very good alternative to natural materials – stone, brick, wood.

KAMROCK ® is a choice of professionals!

WHY DO OUR PARTNERS AND CUSTOMERS CHOOSE US?

- **KAMROCK®** is a **leading manufacturer** of the man-made veneer stone and decorative brick, as well as of other cladding materials and products for landscape design and garden decor.
- **KAMROCK®** is acting **since 1997 on the market**, it was the **first manufacturer** of such products **on the whole territory of CIS**. During this time the company has gained popularity and a very good reputation among professionals of this sector: construction companies, distributors of construction materials, DIY-store chains, architects, designers.
- **KAMROCK®** is a **permanent participant** of such **well-known programs** on the Russian television as "School of Renovation" (TNT), "Fazenda" (1-st Channel), "Country-house Response" (NTV).
- **KAMROCK®** is a **rock-solid** industrial enterprise located on the territory of more than 5 ha with its own developed infrastructure, which is essential for **reducing production costs** and for **stable operation** of the factory.
- **KAMROCK®** uses the most **advanced production technologies** and **eco-friendly natural raw materials** (cement, sand, pigments etc.). Sanitary-Epidemiological Conclusion Certificate, Fire Safety Certificate, Certificate of Conformity, ISO9001 Certificate.

Expert in finishing and decorating of facades since 1997

More than 3,5 million square meters of stone

More than 120,000 transfigured homes

ADVANTAGES OF OUR PRODUCTS:

- **UNPARALLELED QUALITY**
Due to the **high degree of texture and color imitation** of natural materials you will hardly notice a difference between our cladding materials and their natural counterparts: stone, brick and even wood.
- **WEATHER RESISTANCE AND DURABILITY**
Our products comply with strict requirements to their weather resistance and durability, so can be used **almost in all climate zones** no matter if it is hot air of Andalusia, wet winds of the Baltic coast or frosty and snowy atmosphere of Siberia!
- **LIGHT WEIGHT**
2-3 times lighter than natural prototypes, which allows reducing the load on foundations and load-bearing structures.
- **HIGH STRENGTH**
Due to the use of **concrete** instead of plaster our products can be used **not only indoor, but also outdoor** and have **increased resistance** to any external actions and adverse conditions.
- **REASONABLE PRICE WITHOUT COMPROMISING ON QUALITY**
We can compete even with nature – our hand-made cladding materials are considerably **cheaper than their natural prototypes**: natural stone, brick, wood.
- **CONVENIENT AND EASY TO INSTALL**
Completely flat backside, ready tiles of various sizes, including corner elements – so it does not require special training and inviting skilled craftsmen for installation. Besides, our materials **can be installed on various types of surfaces**: wood, metal, brick, concrete; both indoor and outdoor.
- **EXTENSIVE PRODUCT RANGE** (*types, textures, colors*)
Our product range will meet any ambitious wish of any customer, so he could feel like a co-creator of his own living area. We try to be **in line with regional decoration and architecture trends** and are **capable to produce new textures and colors** suitable for each area and consumer's taste.
- **THE WIDEST RANGE OF APPLICATION POSSIBILITIES**
Our materials are suitable for **facades and interiors, private and terraced houses, bars and cafes, landscape design and loft apartments**.

Any home, garden or commercial object will get at once a **new individual look, unique spirit and an additional value** with our gorgeous stone outfit.
