**NEW**

**NEW PRODUCT** from the creators of the first in the world wide format UV-LED Inkjet Printer

# SUN Universal UV-LED

**REVOLUTION ON THE MARKET OF UV PRINTING:**  
Premium class functions are delivered in low cost models

**Provide clients with unbeaten quality**

Friendly and clear control of the printing process, due to **web interface**. Control the printing process from computer, laptop, tablet or even smartphone (using the most popular internet browsers)

**Take more orders and perform them in time or faster**

**Automatic positioning system** – thickness and X-axis would save time and lead to high quality printing on substrates up to 200mm thick. High accuracy laser beam is capable of sensing even a sheet of thin paper on the printing table!

**Save up to 30% on servicing and changing the printing heads**

**Automatic carriage parking system, conservation and cleaning** of printing heads would take care of the condition of printing heads during and after the print

**Keep control of the business, even being away from it**

Software is capable to give you **control** over the main parameters of printer operation and maintenance in internet

**Get more profit by printing heavy substrates**

Redesigned additional tables allow to print on substrates **up to 130 kg**

**Print faster than competitors**

Function „**skip white fields**“ does not allow carriage to waste time over the empty spaces in print

**Maximum excluding of human factor**

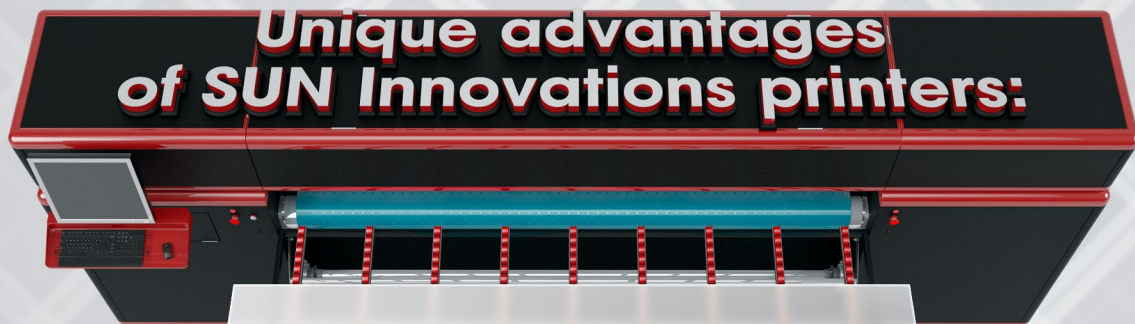

**Emergency carriage stopping system** would stop the printing process in case of rough spots on the material, preventing the damage of carriage and printing heads as well as the material.

**Work without delays**

**Automatic ink level measurement system** would remind you to restock

**Get a reliable assistant in business for a reasonable price**

**Be confident! 2 year warranty period for printer SUN Universal UV-LED**

- capable to print on practically any substrate, even on a water surface!
- Printing on materials up to 20 sm thick
- Direct printing on laptops, tablets, mobile phones
- 3dementional printing of up to 6 mm thick (stained glass imitation, Braille text, fine art reproductions)

### EASY TO PRINT

User-friendly interface  
Automatic conservation and cleaning of printing heads  
Laser beam is sensing substrate thickness  
Automatic material positioning  
Vacuum table zones are controlled by buttons

### CONVINIENT HANDLING

Easy print head alignment  
Free access to electronics  
Retractable platform for ink bottles

### SECURE INVESTMENT

Important parts are protected from wear out and breaking  
Equipment from manufacturer (Russia)  
Service support and full education  
Targets 9 perspective markets  
Payback during 1 year\*

## Line of printers SUN **Universal** UV-LED

- Hybrid: quality print on rigid and rolled media
- Any substrates, even non heat resistant: banner, film, glass, ceramics, MDF, wood, granite
- Maximum weight of printed media up to 130 kg (distributed weight)
- Material thickness up to 20 sm(unique)
- Sunflower inks from manufacturer
- Automatic carriage parking system, cleaning of printing heads and ink level measuring
- Function „skip white fields“ and minimum human factor in positioning the material
- Manufactured: Russia
- Warranty period 2 years\*
