The research center of company «GENIKS»

The research center under the leadership of Alexey Malkov, Ph.D., Laureate of the State Prize of the Russian Federation in the field of science and technology is the new experimental laboratory created for the effective solution of important technological and production tasks. Among them is development of new solid forms of disinfectants.

Advantages of using of the tablets forms

- High concentration of active ingredients
- Savings in transport costs up to 70 %
- Usability, dosing accuracy – 1 tablet per 10 liters of water (there is no need for measured container)
- Transportation is possible any transport as tablets are nonflammable and explosion-proof
- Storage from - 30° C to +35° C

New development – the disinfecting tablets «without chlorine» based on polyguanidines

- Biocidal action of polyguanidines
- The prolonged effect
- Low toxicity
- High stability of working solutions

Advantages of tablets based on polyguanidines

Group of disinfectants	Profitability (1 tablet per 10 liters of water)	Low toxicity	Detergency	Strability of workong solutions	Existence of a pungent smell	The prolonged effect	Economy of warehouse
Tablets based on polyguanidines	+	+	+	28 days	-	+	+
Tablets containing chlorin	+	-	-	3-6 days	+	-	-
