PLENARY SESSION

«GRAIN MARKET IN A NEW REALITIES: CHALLENGES AND OPPORTUNITIES»

The grain sector is a key element of ensuring food security, which is one of the key factors in maintaining sustainable economic development in a growing world population, increasing environmental challenges and global climate changes.

Climate changes, instability of the agricultural sector and world economy in the whole form new challenges for the world grain market players and open up new opportunities for the development of international collaboration.

Topics for discussion at the Plenary Session:

- Ensuring global food security in the conditions of limited land and water resources, reducing soil fertility, climate changes;
- Formation of the new architecture of the world grain market: perspective approaches and opportunities;
- The potential of the Eurasian Economic Community in addressing the problems of global food security;
- Attraction of the direct investments in the grain sector and the potential of cooperation within the SCO and BRICS;
- Reducing trade and administrative barriers as a mechanism for the world grain market development in the context of high volatility of currency exchange rate and general economic recession
