

Dear sirs!

We would like to offer you a very good product – **Ural pulpstones**.

Since 1934 Ural Pulpstone Factory in Russia produces reliable and high quality ceramic pulpstones with widespread usage in pulp and paper industry.

For the production of each pulpstone used high quality raw materials. Ceramic segments are made of high-quality alundum with the best characteristics. Concrete core – from specialized cement, all elements are binded with know-how binder.

That is why our pure Al₂O₃ «whitestones» maximize stone productivity and minimize specific energy consumption.

Estimated time of supply – 15-20 weeks from the order.

Our standard specifications and assortment you can find below, but we will be glad to discuss with you all your specific requests.

Specifications	
Thickness of working layer, mm	≥70
Compression strength of concrete core, MPa	≥50
Maximum rotational speed of stones, m/s	38
Graininess of the working layer	in units of GRIT
Working layer hardness	in units of the USA hardness scale
Structure of abrasive layer in units of USA standards	5,6,7,8

Assortment									
Designation	D1	D2	D3	D4	D5	D6	L	L1	Weight, kg
1500x1250	1500	1200	750	640	450	500	1340	1250	5300
1500x1370	1500	1200	750	640	450	500	1460	1370	5800
1700x1370	1700	1300	770	660	480	510	1460	1370	7500
1800x1250	1800	A	-	722	580	610	1250	1250	8000
1800x1370	1800	1420	890	780	580	610	1460	1370	8000
1800x1700	1800	1300	-	772	580	610	1700	1700	9500
1900x1250	1900	1400	-	800	630	650	1250	1250	8000

Our key advantages are: **excellent quality, competitive prices and fast delivery.**

Also, it could be more convenient for you to have a direct contract with some of our European partners.

We sure that “EU-EU contract” make this deal for your more simple and less risky.

To contact with our company you can visit our website www.bestpulpstones.com or call us +7 (911) 359 29 59.

Please, feel free to ask any additional information.

Looking forward to your reply,

Director of “Regional Ecological Project”, LLC
