Dear Sir / Madam!

Investment Promotion Agency of Novosibirsk Region is a team of professionals aiming at investment attraction and complex support of the investment projects at all stages of the implementation. We undertake the task of interaction with the authorities and resources supplying organizations in the implementation of your investment projects. We are the "single window" of the region for the investors.

Our biggest project – the Industrial-Logistics Park of Novosibirsk Region – is the largest industrial park in the eastern part of Russia. It has convenient location – 12 kilometers from the regional center and 5 kilometers from the international airport, between the federal highway and Trans-Siberian railway which connects the western and the eastern parts of the country. The total area of the Park of 1172 ha includes 300 ha which are free and ready to accept new residents. The park is provided with well-developed infrastructure – motorways, railways, electricity, gas, water. We provide a fast (2–3 months) registration of the land sites rent in the Park at a flat rate, consulting and assistance in any investment questions: development and expertise of the business plans, attraction of financial resources, governmental support etc.

The advantages of the Industrial-Logistics Park of Novosibirsk Region are appreciated by many large Russian and foreign investors. The number of residents reached twenty, large international companies – transnational holding company ARNEG (commercial refrigeration), the American manufacturer of confectionery production Mondelēz, one of the largest Russian companies manufacturing and selling clothes Gloria Jeans – successfully implement their projects here. This area was chosen by the RosAgroMarket holding company for the construction of the interregional distribution and wholesale center of the agricultural products, one of the five throughout Russia.

We understand all of the complexities of the current situation – fluctuations in exchange rates, complication of the exports to Russia. But at the same time I want to emphasize that these factors make the placement of the manufacturing in Russia, and especially in our region, more advantageous. And frequently the most serious barrier for the potential investors is lack of reliable information about the region, about the opportunities that have been created here for business.

We are ready to ruin these barriers by all means, to provide complete information about the investment opportunities in Novosibirsk region. Each investor who is considering our region as an area for the development of their business can expect the full assistance from our team. We are always open for cooperation!

CEO
