About LED-Effect

«LED-Effect» is a Russian manufacturer of energy-efficient LED lighting.

Production areas of «LED-Effect» company are placed in MOSCOW, RUSSIA.

Production area is 20 000 m²

«LED-Effect» company has conformity to International quality standards (ISO 9001:2008)

About LED-Effect

«LED-Effect» company does the whole cycle of production of the LED lighting:

Design and product development

Its own laboratory – conducting tests

Production of LED lighting components

Full manufacture of LED lights on its own site

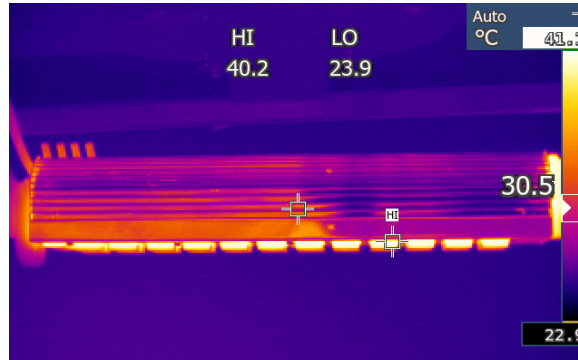

Design and development

Own development allows to maintain interest to the company among loyal customers and helps to attract new ones. It also affects the further quality of manufactured products.

Laboratory

Quality control of raw and finished goods is a stability and placidity pledge of our clients.

Production of LED lighting

The company has modern assembly and soldering equipment, production of metal and plastic body parts equipment, and painting equipment.

Production of LED lighting

High-quality production equipment allows to minimize the amount of substandard products.

According to data of 2012-2016, the percentage of rejected products is less than 1.5%.

Production of LED lighting

Only proven, high-quality components are used in the LED lights production process. As light resources we use LEDs from: NICHIA, CREE, OSRAM.

LED-Effect Innovative development

Experts of the company "LED-effect" developed and patented an innovative technology of heatsink for street and industrial lighting.
