

STANKOMASHSTROY

About “StankoMashStroy”

StankoMashStroy is a machine-building company, mainly active in the manufacturing of modern metal machining equipment. For more than 10 years the company has been successfully selling equipment in Russia and CIS countries and became one of the 10 biggest suppliers.

Main targets of the company:

- restore the machine building industry in Russia
- production of metal cutting machines from conventional to the machining centers
- the best warranty and post-warranty service
- fulfillment of long-term complex projects

History of «StankoMashStroy»

2006	Establishment of the company, development of service department
2007	Participation in the first exhibition
2008	Moscow branch foundation
2011	Production of ST16A50 CNC Lathe
2014	New factory construction, development of ST16k20 conventional lathe
2015	Production of the VTM series milling machining centers, Kazan branch foundation
2016	Batch production of ST16k20 lathe, Yekaterinburg and Saint-Petersburg branch foundation
2016	Self-processing of machine beds for lathe ST16k20, ST16A20 and ST series machining centers

Group of companies “StankoMashStroy”

StankoMashStroy

Production, selection and selling of the equipment.

StankoMashStroy-Garant

Warranty repair and post-warranty maintenance, erection supervision and start-up procedures.

Stanko-Leasing

Providing the leasing of equipment.

Stanko-Logistic

Delivery of the equipment and spare parts to customers.

“StankoMashStroy” Trading Company

Selection and selling of spare parts for the equipment.

Technoport

Manufacture of components, machining services.

Key facts about “StankoMashStroy”

- Modern production facilities
- Individual approach to each customer
- More than 100 highly skilled specialists
- Production area and warehouse occupy 6000 m²
- Many sets of equipment in stock
- A commitment to continuous development

Machines building

ST16k20 Series conventional lathe
Production plan for 2017 – up to 300 sets
Delivery period – In stock sales
Starting price – from 10 000 euro
Export status – **ready for sales**

ST16A20 Series CNC machine
Production plan for 2017 – up to 50 sets
Starting price – from 19 000 euro
Export status – **sales launch second half of 2017**

ST25 turning center
Production plan for 2017 – up to 50 sets
Export status – **sales launch 2018**

ST16k20 series lathe

- High-precision, hardened, ground bed guide ways
- Hard alloy-steel spindle mounted on 6 high-precision bearings
- Heat-treated and ground helical gears
- Adjustable overload release clutch of the lead screw
- Min. spindle speed is 9 rpm
- + /-15 mm transverse displacement of the tailstock to turn long cones
- Coolant supply to the cutting area, halogen lamp
- Spindle brake
- Solid-cast base for the machine

ST16k20 series are nominated for «Top 100 Russian goods»,
national award «PRIORITY-2016».

Production facilities

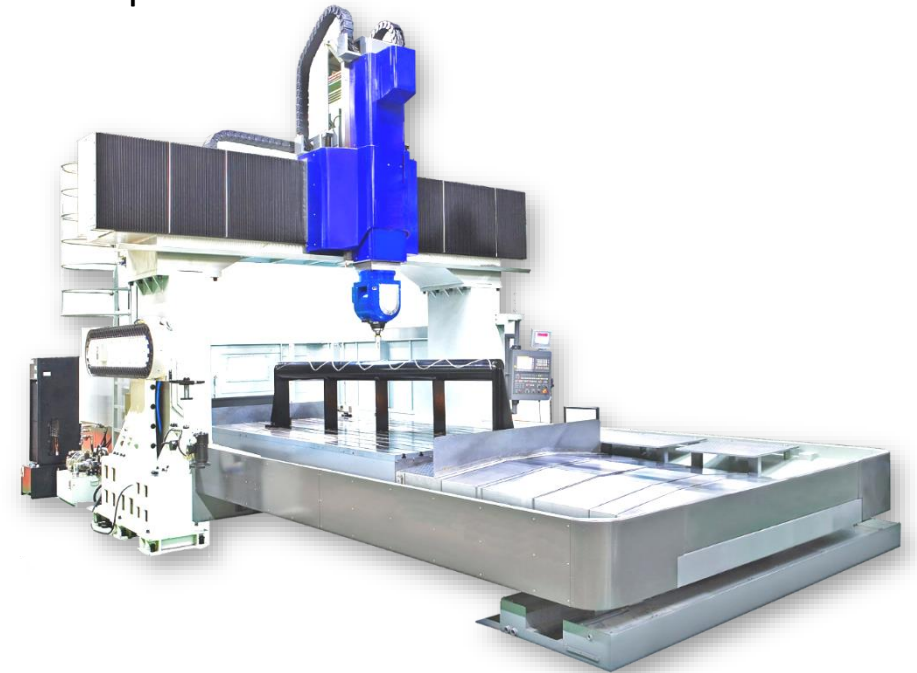

The site are equipped with 5-axis machining centers, 2 gantry type that aimed to achieve the highest machining quality of beds and machine parts.

These are high-precision machining centers. The machines are able to produce complicated parts in one run.

Also these machines are used to provide machining services for other companies in the region.

Production is going to be equipped with the measuring machine to control the precision.

Contacts

We are looking forward to a further fruitful cooperation!
