Dimax chlor

Chlorine-containing disinfectant in tablets

Ingredients: sodium salt of dichlorine isocyanuric acid, functional components

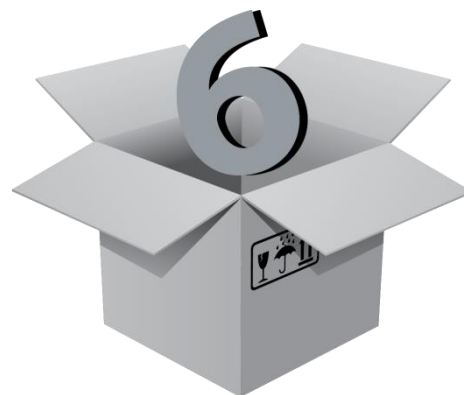

Volume: plastic jar 1 kg (370 tablets)

Price (including VAT): 9,94\$ per jar

Quantity per box: 6 jars

Certified: ISO 13485-2011

Retail packing

Advantages:

- Classical disinfectant based on new technologies
- Highly effective and cost-effective disinfectant
- 1 tablet for 10 liters of working solution for anti-bacterial mode
- Good dilution properties; Dimax chlor tablets are not required to be mixed to be diluted
- High content of active chlorine (tablets – $56\% \pm 5,0\%$, granules – $33\% \pm 9,0\%$)
- Excellent sorption properties (granules)
- Active chlorine content corresponds to the stated parameters over the whole period of the working solution's shelf-life
- Working solutions can be used multiple times; shelf-life of the working solutions is 5 days
- Working solutions does not have aggressive smell of chlorine

INTERSAN-plus LLC

BonExtra M

Universal concentrated disinfectant and liquid detergent

Ingredients: QAC, synergetic additives, surfactants, functional and technological components, corrosion inhibitor, and purified water

Volume: 1 l

Price (including VAT): 2,94\$

Quantity per box: 12 bottles.

Certified: ISO 13485-2011

Retail packing

Advantages:

- Highly effective and economizing disinfectant with the detergent properties
- Biodegradable, safe and environmental friendly
- Disinfection, washing, degreasing, and deodorizing of the processed items in one process
- Perfectly removes fat, oil and proteinaceous contaminations; doesn't decolour the linen, and doesn't cause corrosion of metals
- Can be used in automatic washing machines for disinfection and washing the linen; in automatic dishwashers for disinfection and washing the dishes
- For checking if there is residual of fat on firm surfaces, we recommend to use the indicator «VBI-control»
- Shelf-life of working solutions - 41 day

Min. amount: 10 thousand liters

Payment: 100% prepayment

Sterox

Ready-to-use high-level disinfection and sterilization product

Ingredients: stabilized glutaric aldehyde, functional components, corrosion inhibitor, and purified water

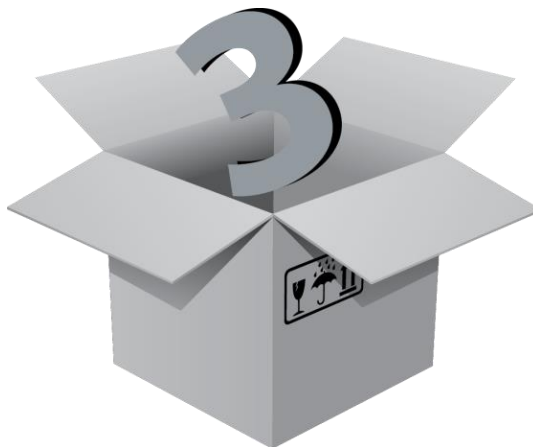

Volume: 5 l

Price (including VAT): 11\$

Quantity per box: 3 canisters

Certified: ISO 13485-2011

Retail packing

Advantages:

- Patented formula of stabilized glutaric aldehyde, characterized by low evaporation and toxicity
- Does not damage medical instruments and endoscopes
- Does not cause metal corrosion or damage optical devices and adhesive connections of the instruments
- Short contact time
- Shelf-life of the solution after opening the canister – 90 days

Min. amount: 10 thousand liters

Payment: 100% prepayment

Sterox oxi

Ready-to-use two-component oxygencontaining solution for high-level disinfection and sterilization

Ingredients: peracetic acid, hydrogen peroxide, stabilizers, functional components, corrosion inhibitor, and purified water

Volume: 5 l +50 ml

Price (including VAT): 19,63\$

Quantity per box: 2 canisters

Certified: ISO 13485-2011

Retail packing

Advantages:

- Highly effective and low-toxic solution for sterilization and high-level disinfection
- Neutral pH of the activated solution
- Does not damage the processed surfaces, doesn't cause corrosion of metals (including products made of aluminum and the anodized aluminum)
- Doesn't cause turbidity of optics (if the producer admits the use of hydrogen peroxide containing solution), doesn't destroy adhesive connections
- Short contact time
- Shelf-life of the non-activated solution – 1.5 years
- Shelf-life of activated solution – 10 days

Min. amount: 10 thousand liters

Payment: 100% prepayment
