

Joint-stock Company “Zavod ZhBI-2”

The largest enterprise of construction industry in the Kaliningrad region

MAIN PRODUCT: prestressed hollow core slabs. Possible dimensions: width 600 - 1500 mm, height 160-520 mm, length 2400 – 12000 mm

Also a large range of other reinforced concrete products, including wide experience in the production according to individual drawings of the customer.

About US: We are the largest enterprise of the Kaliningrad region working since 1948. We produced more than 5000 type of concrete products. Annual capacity is more than 100 000 m3 of concrete products. We use the most advanced technologies of production of slabs by extrusion. We have wide experience and qualified staff. We develop our own deposits of sand and gravel and have our own laboratory and quality department carrying out multi-stage quality control.

EXPERIENCE in SUPPLY: We have wide experience on the regional market in the Kaliningrad region. Construction of the most part of houses, schools, kindergartens, objects of infrastructure was completed with reinforced concrete products of our production.

REPUTATION and ACHIEVEMENTS: Achievements and reputation of our company have been repeatedly recognized by regional and Federal authorities and are confirmed by government diplomas and awards.

ADVANTAGES of COOPERATION with US: The main advantage of cooperation with us is a lower price at the same level of quality. This is achieved by currency exchange rate differences, lower cost of materials and labor.

Kaliningrad region has a developed port infrastructure and allows transporting products by sea.

We are ready to organize the supply of products necessary for the construction site in batches in the required time directly to the location of the construction site.

A manager who works with each client speaks business English/German and is in full control of the supply.
