132			65 x136	3 277	

The houses are made from profiled dry and glued timber of spruce and pine up to 6 meters length.

A prefabricated house contains: wall beam, floor decking, roof decking, frame timber, floor beam, windows, doors, windproof planks, facial board, baseboard, assembly drawing.

Simple construction with step – by – step user manual.

A buyer provides assembling of a house and pours concrete for a foundation. There are several options for foundation: strip foundation, piles foundation, foundation slab.

Certificates: application of certified AkzoNobel glue.

The prices are for EXW terms of trade, though the company is ready to work with FCA and DAP.

Transportation by truck or by a container.

The prices are real for the current moment and could change depending on the market.
