

**ATTIKA**  
Resin's expert

*We produce high quality RESINs so that our Customers can create high level Goods.*

ATTIKA is operating in chemical market since 2006 year.

Since 2017 г. We are participating in government program by import replacement products

## Focus on 2 business segments

Adhesive  
production

Sealants production

Composite

Coatings production

Professionalism

Respect

Efficiency

Finance

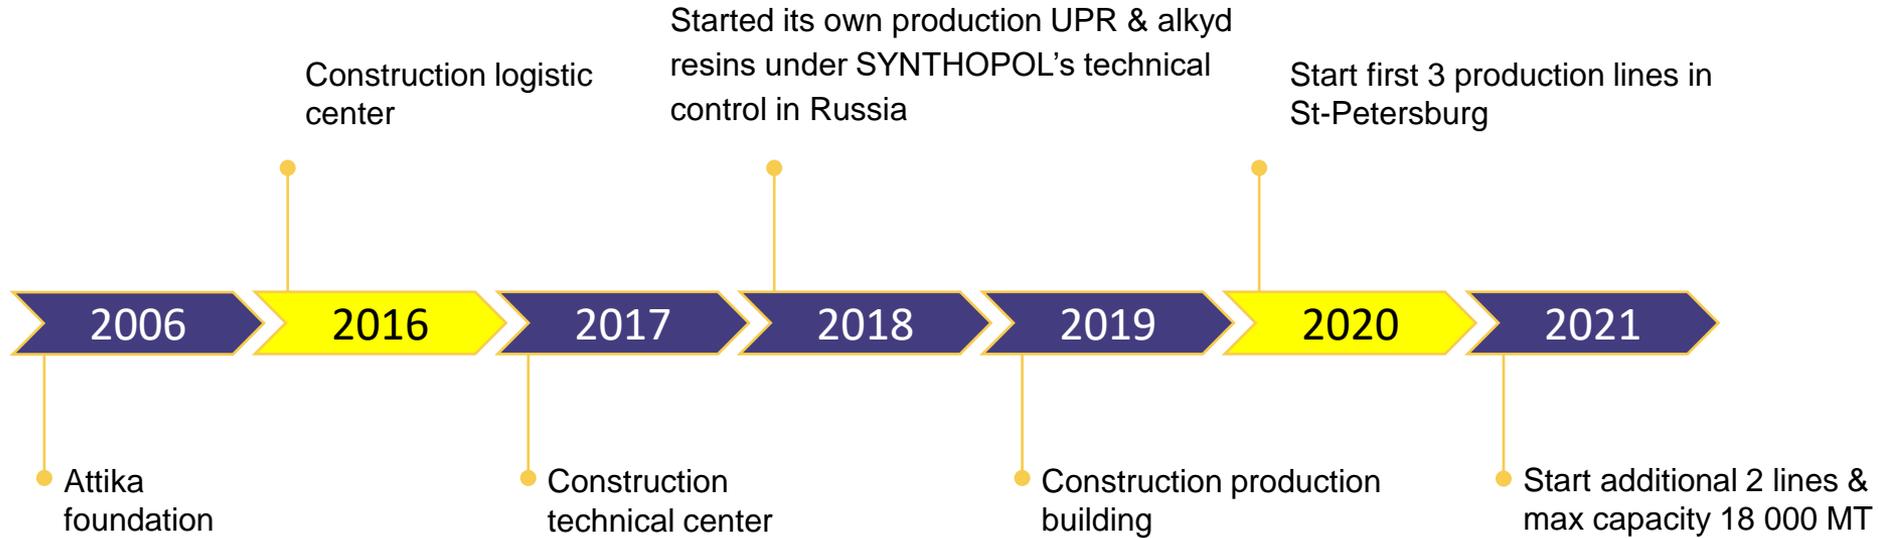

## WHY We?

### Advantages:

- Modern high-efficiency production;
- High level of technical support;
- Efficiency logistics;
- Customer relationships;
- Products are available in any regional stock;
- Possibility resin production according to Customer's request;

15 Years market experience

*Main purpose of our technical service is not simple promoting starting formulations but researching & development new technology in CAS & composite materials*

**ATTALATE** - Alkyd resins for 1P & 2P coatings;

**ATTSHIELD** - Unsaturated polyester resins for composite materials;

**ATTACRYL** - Thermoplastic acrylic resins for metal, construction, road marking;

**SYNTHOPAN** - Unsaturated polyester resins for infusion & pultrusion process;

**SYNTHALAT** - Acrylic resins for 2P coatings
