PROCESSING AND UTILIZATION OF MANURE

FOOD AND SLAUGHTERHOUSE WASTES

Business area

**FOOD AND
SLAUGHTERHOUSE
WASTES**

Waste-handling: paunch manure, slaughterhouse wastes, brewery wastes, distillery stillage etc.

**DRAG HOSE
SYSTEMS**

High-performance technology of manure application into soil

**IRRIGATION
SYSTEM**

Design and implementation irrigation projects

Short-term and long renting offers the possibility of using any technology without any financial exposure

RENT

**PROCESSING
AND UTILIZATION
OF MANURE**

MANURE
PROCESSING

Production from renewable energy sources

BIOGAS

**PUMPS
AND MIXERS**

Transfer liquids, manure, slurry and other liquids

Stationary and floating mixers

High volume water transfer in emergency cases.

**WATER
TRANSFER**

We are professionals at B2B project sales

Highly qualified specialists work at our company.

The staff of Sales Department can:

- Solve a Client's problem;
- Suggest the best solution;
- Make all necessary calculation;
- Demonstrate the benefits of our solutions;
- Prove the short payback period and cost advantages.

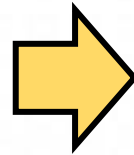

We suggest to our Clients cost effective solutions (cost saving and extra profit).

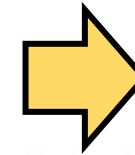

MANURE PROCESSING SYSTEM

BEFORE

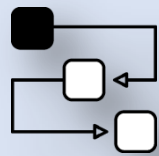

**Comprehensive
approach to the
clients issues**

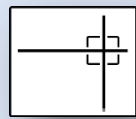

AFTER

1

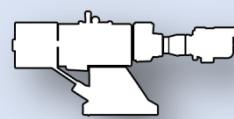

Design a process

2

Negotiate on draft

3

Select the best equipments

4

Supply

5

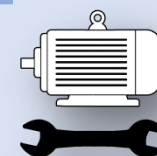

Assembling and commissioning

6

Staff training and performance development review

7

Warranty and maintenance service

8

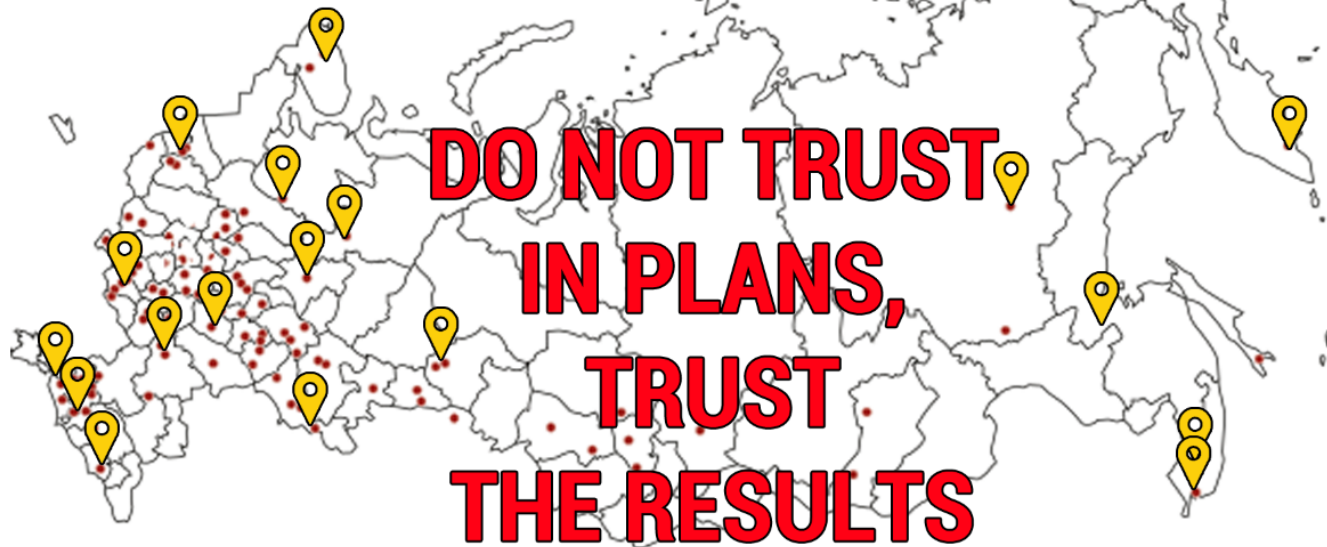

Supply and repair spare parts
