

A respirator with the highest protection level against viruses and bacteria with clustered silver layer

- Destroys harmful bacteria or viruses protective shell;
- Self-cleaning mask and respirator filter layer surface;
- Extends the product life up to 14 days;
- Long-term protection is more than the mask or respirator physical life;
- Biologically active silver does not evaporate the meltblown layer and absolutely safe

**European standards quality compliance certification for medical devices:
EN ISO 15223-1, EN ISO 10993-1, EN 14683, EN ISO 14971**

five layers of the highest quality materials, 2 of which are melt-blown.

The mask corresponds to the original technology and contains a hydrophobic layer Hot-Air Cotton with a density of 50 g/m².

Made in Russia, Argentera Medicals
Total density: 175 g / m².
meltblown: the highest quality BFE 99%.

FFP2 protection level on elastic bands.
Color: white
Packaging in PET for 5/10 pcs.

Delivery terms FOB Novosibirsk

Medical protective respirator KN95 without exhalation valve, protection degree FFP2 with elastic bands
Color: standard - white;

By request: blue, pink, green.

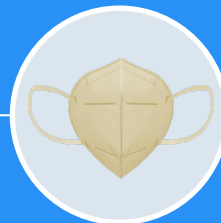

Retail from 1 pcs.....0,34 €
Wholesale: from 10 000 pcs.....0,17 €
Wholesale: from 50 000 pcs.....0,11 €

A mask and respirator with the highest protection level against viruses and bacteria with clustered silver layer

Argentera Medicals silver filter layer unique properties:

- Destroys harmful bacteria or viruses protective shell;
- Self-cleaning mask and respirator filter layer surface;
- Extends the product life up to 14 days;
- Long-term protection is more than the mask or respirator physical life;
- Biologically active silver does not evaporate in the meltblown layer and absolutely safe.

Silver products benefits provided delicate handling:

1 respirator with silver lifetime is 14 days
1 respirator with silver = 28 respirators

Save 60% with the purchase of silver-based mask or respirator.

Company strengths:

- Own production with patented technology smooth silver meltblown fibers deposition.
- Automated line with the ability to control and monitor nanoparticles application.
- Meltblown corona treatment and electrolyte components to retain bacteria and viruses on fiber surface.
- Collaboration with leading research and medical centers.
- Own RND center with testing laboratory to improve and develop new technologies.
- Masks and respirators certification.

Planet ecology protection contribution!

Our company manufactures a product that reduces harmful waste percent during recycling by 40 times. For 1 sq.m. earth surface area there are 8 commonly used masks per day. By purchasing silver-based products masks consumption will be reduced, thereby contributing to the ecology protection.

Delivery terms FOB Novosibirsk

Respirator mask with special protective silver-based meltblown layer.
Color: standard gray, black, brown, beige
Carton pack: 1/10 pcs.

Retail from 1 pcs.....3,45 €
Wholesale: from 10 000 pcs.....2,8 €
Wholesale: from 50 000 pcs.....2,3 €

We offer you a new unique service for applying full digital color printing with sharply drawn details on medical respirators KN-95. Performance up to 50.000 respirators per day

Our Advantages:

- Minimum print volumes — 1,000 pcs.;
- The maximum size of the image is 5x6 cm;
- Individual package;
- automated process; eliminates human factor
- Printing equipment: doesn't grease the picture, change the image quickly, prints with eco-friendly paints

It would be a great choice for those companies, who organize mass events: exhibitions, presentations, sport events, concerts, servicing, public catering. Argentera Medicines is a subsidiary of the IQDEMY Group holding, a leader in the Russian market in the development and implementation of complex

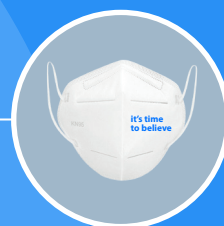

digital printing solutions. Against the background of unstable situation and introducing of mask regime in 2020 year, a digital automated production line for the development of printing services on medical products was developed.
