# BINTOFF.RU

Dear Partners and Colleagues,  
As a result of our business fast growth,  
we penetrate into new market areas,  
try new related activities and develop  
new for us working methods.  
Our growth also resulted in opening  
new stores in new areas of presence in  
Russia and the CIS countries.

As a growing company, we are extremely interested in new medical products, suppliers and expanding the range of our products for such fields as:

**UROLOGY**

**SURGERY**

**REHABILITATION**

**ONCOLOGY**

We specialize in «ostomy care», «women with breast cancer treatment and rehabilitation», «falo prosthetics», «treatment and rehabilitation of the people with larynx cancer», «voice devices», «medical nursing consumables», etc.

We are also highly interested in companies which are not represented at our market, or in companies which just started their business at the market of Russia (especially North-Eastern region) and the CIS. In partnership with such companies, on the basis of mutual partnership, we will achieve success!
