We have developed a methodic solving the main problem of modern education - the lack of consistent technical education for children. This methodic helps 50,000+ children in 18 countries to study in ROBBO Clubs and learn Robotics, Programming, 3D-Printing and other Engineering disciplines.

ROBBO products and solutions will prepare children for a promising highly paid creative profession in the world of the future, where all the monotonous work is done by robots. Innovative set of equipment and electronic educational complex allow children to be truly creators, educators use a modern technology and everything together develop.

As market player, ROBBO is recognized internationally and has registered offices in Russia, Finland and Japan and two certified production facilities of robotic education kits in Finland and Russia.
