RESIDENT COMPANIES PRODUCTS

Software products for IPTV/OTT projects

Biometric locks and locking systems

Training Platform «SmartCar» with technical vision

Mobile applications

Software for working with 3D images without glasses

Business Process Management Systems

Enterprise Content Management Systems

E-commerce Solutions

Software & Hardware products for encoding, decoding, processing, receiving and transmission of video and audio data in different formats.

CAD Software

GIS Software

Healthcare Software Solutions

RESIDENT COMPANIES PRODUCTS

Equipment and materials for drilling, construction of wells and service support

Information and telecommunication systems to exchange data with mobile and remote objects

Antiseptic dressings

Machines for plasma cutting of metal

Gear on the basis of eccentrically cycloidal engagement

Chemical reagents

Development of new technologies and materials in the field of petrochemistry

Nonlinear optical and electro-optical crystals

Induction heating equipment

RESIDENT COMPANIES PRODUCTS

Endoscopic equipment

Medical diagnostic equipment

Equipment for Cardiovascular Surgery

Medical Urological equipment

X-ray machines

Prostheses

The equipment for minimally invasive surgery

Surface modification of materials and medical products

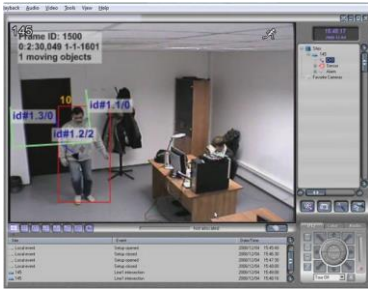

RESIDENT COMPANIES PRODUCTS

Specialized software, high-tech components advanced radio systems for military and civil purposes.

LED lamps of new generation

Software for video analytics

Complex projects and equipment for technological communication and automation

Software in the field of digital audio and video, multimedia solutions

Software and hardware security

Electric drive monitoring and control devices

Engineering a world-class service
